# Problem Iteration:

- ➡ Mental illness in Nepal is heavily stigmatized, often seen as a result of evil spirits, karma or weakness, leading families to hide it.
- ➡ People seek help from faith healers instead of professionals.
- ➡ conditions like anxiety and depression are rarely recognized.
- ➡ lack of nationwide surveys or mental health statistics.

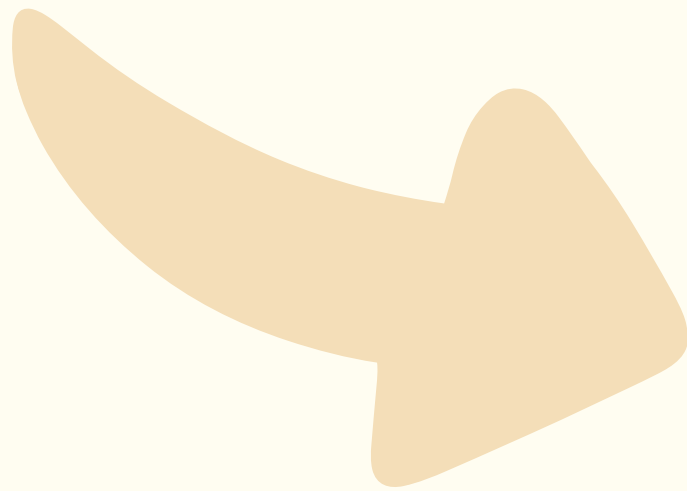

# SOLUTIONS

- ➡ Increases awareness & self-understanding
- ➡ Reduces isolation and builds community
- ➡ Immediate help for people in danger
- ➡ provides tools to calm the mind
- ➡ Builds trust by protecting user data.
